

Job Title: Experienced DevOps Engineer

Location: [City, State] | [Remote/On-Site]

Job Summary: We are looking for an experienced DevOps Engineer to join our team. The ideal candidate will have extensive experience with cloud platforms, automation, and continuous integration/continuous deployment (CI/CD) pipelines. This role involves collaborating with development and operations teams to streamline processes and improve system reliability.

Key Responsibilities:

- Design, implement, and manage CI/CD pipelines and automation processes.
- Develop and maintain infrastructure as code using tools like Terraform or Ansible.
- Monitor and optimize system performance, reliability, and security.
- Collaborate with development teams to integrate code changes and deployments.
- Troubleshoot and resolve issues related to software deployments and infrastructure.
- Manage cloud services and ensure scalable and secure cloud environments.

Qualifications:

- Bachelor's degree in Computer Science, Engineering, or related field.
- 5+ years of experience in DevOps or a related role.
- Proficiency in CI/CD tools (Jenkins, GitLab CI, etc.), cloud platforms (AWS, Azure, GCP), and containerization (Docker, Kubernetes).
- Strong scripting skills in Python, Bash, or similar languages.
- Excellent problem-solving and communication skills.
