

Business Intelligence (BI) Analyst

Job Title: Business Intelligence (BI) Analyst

Location: [City, State] | [Remote/On-Site]

Job Summary: We are seeking a Business Intelligence (BI) Analyst to analyze complex data and provide actionable insights to support business decisions. The ideal candidate will have experience with data visualization tools and a strong analytical mindset.

Key Responsibilities:

- Design and develop interactive dashboards and reports using BI tools (Power BI, Tableau, etc.).
- Analyze business data and trends to provide actionable insights and recommendations.
- Work with stakeholders to understand their data needs and deliver solutions that meet their requirements.
- Ensure data accuracy and integrity by performing data quality checks and validation.
- Develop and maintain documentation related to BI solutions and processes.

Qualifications:

- Bachelor's degree in Business Intelligence, Data Analytics, Computer Science, or related field.
- 3+ years of experience in BI analysis or a related role.
- Proficiency in BI tools (Power BI, Tableau, etc.) and SQL.
- Strong analytical, problem-solving, and communication skills.
